Rice Market Report

Italy: The rain is still not arriving in northern Italy. In recent weeks this is the main concern. There is great concern that the 2022/2023 campaign scenario will repeat itself.

Without water some farmers could change their minds and plant something else.

There's not much trade. It has to be said that this is a difficult market, prices are high, and it is difficult to find paddy which complies with EU limits for cadmium. Farmers are inclined to want to sell paddy lots that are not compliant and keep the compliant lots to sell them later or asking €50 to €100/mt more than the market price.

We can note a price reduction on by-products.
