## Rice Market Report

**Italy:** The Italian market has been quite stable in recent weeks, the price of long A japonica paddy has officially dropped a little compared to the beginning of the year. However, it seems that they have lowered the price of paddy in the lists to see if it would be possible to acquire some at a lower price (given the quantities available). But for now, farmers prefer not to sell.

The Omega round paddy went down this week by around €20/mt.

The Indica paddy does not change, it officially remains at the price of €500/mt.

The price of by-products has been on a downward trend since the end of January. The lower quality of this crop creates more by-products than the previous harvest.
