## Rice Market Report

**Italy:** There have been drops in paddy prices at the market this week.

- -€50/tm for Centauro, Terra, Loto and similar

We therefore note declines in paddy prices, but it again seems that reality does not reflect the theory. The farmers only agree to sell the essential minimum, they are not happy with the paddy prices. As a result, we find ourselves with a blocked market in which it is very difficult to make paddy covers.

Many different prices also circulate, for the same product there can be big differences, also depending on the desired loading period. On the prompt you can have lower prices than when you look for merchandise from March-April forward. Rice mills must consider possible increases in paddy prices.

By-product prices remain stable.
